

Open EAR™

"Open Ear" or "Open Fit" type hearing products have taken a priority position in today's market because of what they have to offer. According to the NATIONAL HEARING INDUSTRIES ASSOCIATION, behind-the-ear type fittings (such as OPEN EAR) now make up 42.8% of all fittings performed in the first half of 2006, up from less than 16% before 2001. (Hearing Review, Aug. 2006.)

Consumers have reacted very positively to them because they are easy to use, there is no bothersome occlusion when they are worn with OPEN TIPS and they are cosmetically acceptable. Unlike many of the other units on the market, E.A.R., Inc. has taken access to the current technology and provided a memory circuit designed to compress loud sounds such as WIND NOISE or GUNFIRE when CLOSED tips are attached. In other words, the **Open EAR-D** has been designed to be **MULTIFUNCTIONAL** and can be purchased for considerably less than most conventional hearing aids.

Audiograms from board-licensed providers can be accepted with orders. All orders come with 30-day return privilege and 1-yr. warranty.

For complete details, see: www.openE-A-R.com or www.earinc.com.
